

## Perspectives in Logic ASL Order Form

Perspectives in Mathematical Logic was initiated in 1969 by the Omega Group. Initially it was supported by a grant from the Stiftung Volkswagenwerk and appeared under the auspices of the Heidelberger Akademie. Since 1986 it has been published under the auspices of the Association for Symbolic Logic.

This series is now being published by the Association for Symbolic Logic on its own; a collaboration with Springer-Verlag came to an end on April 30, 2001. Thanks to the generosity of Springer-Verlag, ASL will distribute the available stock of certain books in the series to the logic community at a low price (as has been done with the existing stock of books in the Lecture Notes in Logic). Some books in the series will continue to be made available by Springer-Verlag and others will be reprinted by ASL.

The books available via the ASL are listed below (to order, check the box, fill out the form below, and return as indicated).
