**Games, Scales and Suslin Cardinals  
The Cabal Seminar I  
Volume No. 1**

**Alexander S. Kechris**  
*California Institute of Technology*  
**Benedikt Löwe**  
*Universiteit van Amsterdam*  
**John R. Steel**  
*University of California, Berkeley*

The proceedings of the Los Angeles Caltech-UCLA "Cabal Seminar" were originally published in the 1970s and 1980s. Games, Scales, and Suslin Cardinals is the first of a series of four books collecting the seminal papers from the original volumes together with extensive unpublished material, new papers on related topics, and discussion of research developments since the publication of the original volumes. Focusing on the subjects of "Games and Scales" (Part 1) and "Suslin Cardinals, Partition Properties, and Homogeneity" (Part 2), each of the two sections is preceded by an introductory survey putting the papers into present context. This volume will be an invaluable reference for anyone interested in higher set theory.

2008 / 464 pages / 978-0-521-86750-4 / HB  
List: ~~\$85.00~~ / **Discount Price: \$63.75**

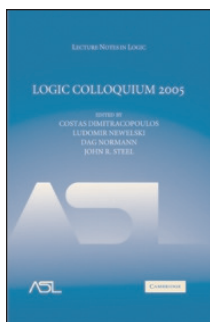

**Logic Colloquium 2004**

**Alessandro Andretta**  
*Università degli Studi di Torino, Italy*  
**Keith Kearnes**  
*University of Colorado, Boulder*  
**Domenico Zambella**  
*Università degli Studi di Torino, Italy*

The Annual European Meeting of the Association for Symbolic Logic, generally known as the Logic Colloquium, is the most prestigious annual meeting in the files. Many of the papers presented there are invited surveys of recent developments, and the rest of the papers are chosen to complement the invited talks. This volume includes surveys, tutorials, and selected research papers from the 2004 meeting. Highlights include a tutorial survey of the recent highpoints of universal algebra, written by a leading expert; explorations of foundational questions; and a quartet of model theory papers giving an excellent reflection of current work in model theory, from the most abstract aspect "abstract elementary classes" to issues around p-adic integration.

2007 / 236 pages / 978-0-521-87061-0 / HB  
List: ~~\$75.00~~ / **Discount Price: \$56.25**

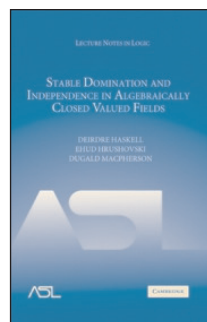

**Logic Colloquium 2005**

**Costas Dimitracopoulos**  
*University of Athens, Greece*  
**Ludomir Newelski**  
*Uniwersytet Wroclawski, Poland*  
**Dag Normann**  
*Universitetet i Oslo*  
**John R. Steel**

Highlights of this volume from the 2005 Annual European Meeting of the ASL include three papers on different aspects of connections between model theory and algebra; a survey of recent major advances in combinatorial set theory; a tutorial on proof theory and modal logic; and a description of Bernay's philosophy of mathematics.

2007 / 236 pages / 3 tables / 978-0-521-88425-9 / HB

**Stable Domination and Independence  
in Algebraically Closed Valued Fields**

**Deirdre Haskell**  
*McMaster University, Hamilton, Ontario*  
**Ehud Hrushovski**  
*Hebrew University of Jerusalem*  
**Dugald Macpherson**  
*University of Leeds*

This book addresses a gap in the model-theoretic understanding of valued fields that has, until now, limited the interactions of model theory with geometry. It contains significant developments in both pure and applied model theory. Part One of the book is a study of stably dominated types and it begins with an introduction to the key ideas of stability theory for stably dominated types. Part Two continues with an outline of some classical results in the model theory of valued fields and explores the application of stable domination to algebraically closed valued fields. The research presented here is made accessible to the general model theorist by the inclusion of the introductory sections of each part.

2007 / 194 pages / 978-0-521-88981-0 / HB

# LECTURE NOTES IN LOGIC SERIES

[www.cambridge.org/us/lecturenotes](http://www.cambridge.org/us/lecturenotes)

- **Serves** researchers, teachers and students in the field of symbolic logic, broadly interpreted.
- **Brings** publications to the logic community with the least possible delay and to provide rapid dissemination of the latest research in the field.
- **Contains** monographs, lecture notes, conference proceedings and reprintings of older, otherwise unavailable, texts.

*For more information on this series of books or to purchase using your exclusive discount code (**ASL25**), please visit:*
