ASL NEWSLETTER November 2008

- **The 2008 ASL Election.** Enclosed with this Newsletter is the ballot for the 2008 election for two members of the Executive Committee of the Council and two members of the Council. For those receiving the Newsletter via email, the ballot is included as a pdf attachment. All terms are for three years beginning January 1, 2009. The Nominating Committee consisted of Michael Hallett, Steffen Lempp, Rohit Parikh, John Steel (Chair), Stan Wainer, and Carol Wood. To be counted, ballots must be returned to the ASL office in Poughkeepsie **by December 31, 2008**. All ASL members are urged to vote.

- **Call for Proposals: 2010 AMS-ASL Joint Special Session.** The ASL Committee on Meetings in North America requests proposals for an AMS-ASL Joint Special Session to be held at the Joint Mathematics Meetings in San Francisco, January 6–9, 2010. Proposals or requests for further information should be sent to the Committee Chair, Jeremy Avigad (email: `avigad@cmu.edu`). The deadline for receipt of proposals is January 16, 2009.

- **ASL Newsletter via Email.** Beginning with the September 2008 issue, the ASL Newsletter is being sent by email to all members for whom the ASL has an email address and who do not specifically request to be sent the printed version. To exercise this "opt-out"provision, either notify the ASL's subscription fulfillment agent at `asl-service@ams.org` or check the appropriate box on 2009 membership renewal forms that have been mailed this month.

- **New Member Benefit: *The Review of Symbolic Logic*.** Individual ASL members now receive the new ASL journal, *The Review of Symbolic Logic*, as an additional benefit of membership. Publication of the *RSL* by Cambridge University Press commenced in June 2008, and members should have received the first two issues.

  Joining *The Journal of Symbolic Logic* and *The Bulletin of Symbolic Logic* as the third official organ of the Association, the *RSL* publishes research papers in: philosophical and non-classical logics and their applications; history and philosophy of logic; and philosophy and methodology of mathematics. The first heading covers all areas of philosophical logic, plus applications of these logics in such fields as computer science, linguistics, game theory and decision theory, formal epistemology, cognitive science, and artificial intelligence. The second is intended to include the history of philosophy of logic, an area that overlaps substantially with what is often called 'history of analytic philosophy'. The third area includes both the philosophy of mathematics and methodological studies of mathematical practice, past and present.

  For more information about the *RSL*, including a complete listing of its Editors and Advisory Board, visit `http://www.aslonline.org/journals-review.html`.
